Roller Garage Door Brochure

2026/01

At Tradedor we specialise in the manufacture of bespoke, double skinned, insulated, remote control, electric garage doors that can be supplied to your specifications and delivered Nationwide.

A Bespoke Service

Tradedor is proud to be one of the leading providers of roller garage doors to trade customers throughout the UK. We take great pride in being able to offer a fully comprehensive service tailored to your specific requirements.

With over a decade of trading to the roller garage door industry we have developed our range of services to be able to supply you with a comprehensive array of quality roller garage door products, made to measure by our expert craftsman.

We want to help you provide your customers with the very best service, alongside our quality products, so you can rely on our team to provide expert advice and guidance throughout.

Our tailored service is the ideal solution for our trade customers; whether you require a complete end-to-end solution, or you just need a quality garage door delivered directly to your customer, anywhere in the mainland UK.

We offer a service that can take care of any of the steps that you require. From supply only to expert installation by our trained installers. We provide sales support literature to inform your customers as well as offering expert advice over the phone for measuring up and installation.

All our garage doors are available in a range of designs and colours and will be tailor-made to your exact specifications by our expert craftsmen. We offer a number of bespoke features and safety functions to ensure the ideal solution for any application.

During and after installation, we also offer excellent after-sales support to keep your customers happy with your service and our products.

Low, competitive trade prices available with our trade accounts

Wide selection of high quality roller doors in a range of finishes, all manufactured by our own expert team

Up to 5 years limited warranty available, with excellent after and pre sales support

Direct, nationwide delivery services are available including express delivery on selected colours and sizes

White label user guides and stickers available to promote your own brand

Able to supply you with a range of sales aids to help promote your business

Expert guidance and instruction or full installation services available

Quality, made-to-measure garage doors to suit any specifications

Roller Garage Doors

One of the many benefits of choosing Tradedor's roller garage doors is that our opening mechanisms are designed so that they do not take up any unnecessary space in your garage. They retract straight upwards and into a compact box, meaning they fit near the ceiling, allowing you to maximise the space in your customers garage for storage or parking.

The smooth opening motion means that the roller garage door you supply can maintain a sleek and sophisticated appearance – with no jerky, shuddering movements as the door opens or closes.

Simple to Install

Our roller doors are simple to install, but to make things even easier for you, we provide comprehensive installation guides to accompany all of our ready-made doors, these are available online in the resources section of your trade account or a hard copy can be delivered with your order. As well as these step-by-step instructions guides we offer a user guide for your customers and marketing brochures for you to promote your business.

We're certain that you will have no problems fitting our straightforward doors, but if you do require any additional help you can contact one of our technical support team via phone or email. Alternatively, if you feel it might be too much or you don't have the time, we are happy to offer an installation service to provide a complete end-to-end solution for you.

Slats

We want our products to reflect our quality craftsmanship, which is why all of our slats are double skinned with a thick foam filled insert and constructed out of strong, robust aluminium for longevity and durability.

TD55 Slats

The slats for our TD55 range of doors are 55mm high and 8.2mm thick with a foam filled insert. The slats are made from powder coated aluminium available in a choice of 14 colours.

TD77 Slats

Our range of TD77 slats are 77mm high, 18mm thick, with a foam filled insert. They are constructed out of high quality, powder coated aluminium and are available in any of the 21 colours in our range, with 14 painted colours and 7 laminate options to give you a wide range of aesthetic options.

They are accurately cut and assembled into the curtain by our on-site team using state of the art machinery to match each individual doors specifications, ensuring a perfect fit, strong seal, and long-lasting performance.

TD77SP Slats

The slats for our TD77SP model have a height of 77mm and a thickness of 18mm. As a special-priced version of our TD77 roller garage door, the SP is ideal for customers seeking a cost-effective solution for a single garage. All TD77SP doors are built in Britain to the highest industry standards and are available with frames in Black, Brown, White or Anthracite, and curtain/slats in Black, Brown, White, Light Grey, Blue, Red, Green or Anthracite.

Our double skinned aluminium slats offer benefits over single metal sheet doors, including:

- Increased insulation and protection from UV and infrared rays
- Strong physical barrier reducing the likelihood of break-ins
- Reduced sound pollution and quieter functioning
- Protection against volatile weather
- Space-saving within the garage

Free Samples

These are photographic representations of our colours. While we've matched them as closely as possible, nothing compares to the real thing. If you'd like a free colour sample, please tell us the colour and the address and we'll arrange delivery.

*Colours can vary slightly due to batch variations.

Black Wood Effect Laminate

* Laminate options are only available in TD77 range. The TD77SP model is only available in Black, Brown, White, Light Grey, Blue, Red, Green or Anthracite. RAL codes listed are the nearest equivalent available.

Guide Runners

We stock a large supply of robust and durable aluminium powder coated guide runners, constructed to the highest quality using the finest materials. Our guide runners are specially designed to allow the curtain to run smoothly and with the rubber or brush in the guide runner to protect the roller door system from debris that can get caught, as well as help reduce drafts. Our guide runners will ensure a long lasting, quality product to ensure complete satisfaction for you.

TD55 Guide Runner

Aluminium

Rubber or Brush

65mm width

27mm depth

Standard range of 14 colours

RAL colour match available

TD77 Guide Runner

Rubber or Brush

95mm width

34mm depth

Standard range of 14 colours

RAL colour match available

TD77SP Guide Runner

Aluminium

70mm width

34mm depth

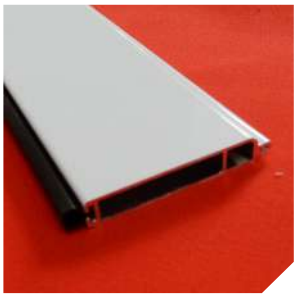

Range of 4 colours

Base Rails

Our base rails are made from extruded aluminium to increase the strength of the curtain of the door, ensuring the longevity of our roller garage doors. All of our base rails come as standard with a rubber strip in the bottom edge to help with insulation and noise reduction, while also working as a deterrent to pests and to provide protection against water ingress; our rubber seals help to keep your garage protected all year round.

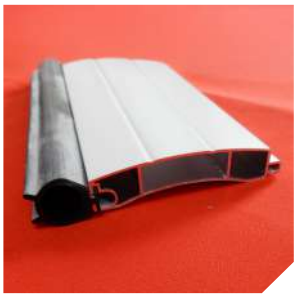

TD55 Base Rail

The last slat of the TD55 base rail is an extruded aluminium slat, powder coated to match the curtain colour. The slat is hollow, 49mm high and 8.2mm thick; there is a small rubber insert at the bottom to cushion the door, with the rubber seal being 6mm wide and 6mm high.

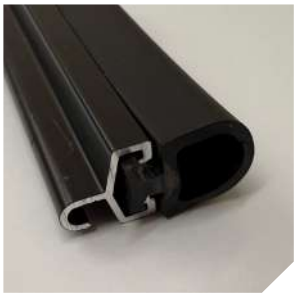

TD77 Base Rail

The TD77 roller garage door has a base rail of powder coated extruded aluminium, made to match the colour of the door's curtain. The slat is hollow, 78mm high and 18mm thick with a rubber seal 15mm in width and 15mm high.

TD77SP Base Rail

The base rail of the TD77SP roller garage door is not extruded like other versions. Instead, it is a smaller profile that slides in with the attached rubber, meaning the last slat becomes the base rail. The slat itself is 77mm high and 18mm thick.

Roll Housing

All of our roller doors are fully enclosed in a roll housing that is designed so it can be installed in a variety of ways:

- Inside the garage behind the lintel
- A limited fixing so as much as possible is behind the lintel
- Fully below and in the opening of your garage
- With the addition of silicone to help seal the joints, they can even be installed outside your garage

We supply a fully enclosed roll housing because it is part of the machinery directive to stop entrapment, and ensures the longer lasting life of the internal mechanism. The enclosed roll housing is constructed out of strong and durable aluminium and can help protect your garage door from any accidental damage that can affect the functionality of your door. Our roll housing and guide runners come as standard in white, but we do offer a colour match facility where possible as an optional extra.

Benefits of a Roll Housing

- Provides a fascia for the door
- Provides the curtain with weather protection all round
- Protects the components of the door from dust or debris that can jam mechanisms
- Creates a very neat appearance
- Reduces operating noise
- Increases the insulation and draught-proofing qualities of the door
- Reduces the risk of fingers, ties, hair etc. being caught up in the mechanisms

TD55 Product Range

Specification

General

Top Box:	205mm (8 inch Square)
Guide Runner Width:	65mm (2 1/2 inches)
Slat Height:	55mm (2 inch)

- Functional as an additional control point or on it's own

Genesis Hold to Run Box (Shutters Only)

- Comes with Two Remotes as Standard
- Automatic Opening, Hold-to-Close
- Dedicated Open, Close, and Stop buttons
- Cover to prevent accidental usage on standard handsets

Eurokit Hold to Run Box (Shutters Only)

- Stylish Leather Keychain attachment
- Automatic Opening, Hold-to-Close
- Dedicated Output for Light Fixtures
- Clear Labelling on Control Box

Why Choose Us?

Here at Tradedor, we tailor our service to every client we work with, guaranteeing the highest level of customer service. This includes:

- Great trade discounts
- Access to parts and spares
- Nationwide delivery to your premises
- Marketing materials that promote your business
- An aftersales service that puts you first

What's more, our entire offering will be made bespoke to your needs, including bulk orders and products in any colour or size.

Brands we work with

In addition to supplying clients nationwide with our Tradedor-manufactured roller garage doors, we also have access to a wide range of products from some of the biggest garage door brands in the industry.

This includes major suppliers like:

- Garador
- Teckentrup
- Fort Doors
- Novoferm

This extends our range, and as well as roller garage doors, it means you can also choose from:

- Sectional garage doors
- Up and Over garage doors
- Side-hinged doors
- Personnel doors

All of these products can be made bespoke to your needs and will be supplied directly to you by the Tradedor team. Parts and spares are also available for all the products we supply.
