

# Garage Door Brochure

2021/22

**At Tradedor we specialise  
in the manufacture of  
bespoke double skinned,  
insulated, remote control,  
electric garage doors  
that can be supplied to  
your specifications and  
delivered Nationwide.**

# A Bespoke Service

**Tradedor is proud to be one of the leading providers of roller garage doors to trade customers throughout the UK. We take great pride in being able to offer a fully comprehensive service tailored to your specific requirements.**

With 10 years of trading to the roller garage door industry we have developed our range of services to be able to supply you with a comprehensive array of quality roller garage door products, made to measure by our expert craftsman.

We want to help you provide your customers with the very best service, alongside our quality products, so you can rely on our team to provide expert advice and guidance throughout.

**Our tailored service is the ideal solution for our trade customers; whether you require a complete end-to-end solution, or you just need a quality garage door delivered directly to your customer, anywhere in the mainland UK.**

We offer a service that can take care of any of the steps that you require. From supply only to expert installation our NVQ trained installation teams are on hand to help. We provide sales support literature to inform your customers as well as offering expert advice over the phone for measuring up and installation.

All our garage doors are available in a range of designs and colours and will be tailor-made to your exact specifications by our expert craftsmen. We offer a number of bespoke features and safety functions to ensure the ideal solution for any application.

Following installation, we also offer excellent after-sales support to keep your customers happy with your service and our products.

Expert guidance and instruction or full installation services available

---

Quality, made-to-measure garage doors to suit any specifications

# Roller Garage Doors

**One of the many benefits of choosing Tradedor's roller garage doors is that our opening mechanisms are designed so that they do not take up any unnecessary space in your garage. They retract straight upwards and into a compact box, meaning they fit near the ceiling, allowing you to maximise the space in your customers garage for storage or parking.**

**The smooth opening motion means that the roller garage door you supply can maintain a sleek and sophisticated appearance - with no jerky, shuddering movements as the door opens or closes.**

# Simple To Install

**Our roller doors are simple to install, but to make things even easier for you, we provide comprehensive installation guides to accompany all of our ready-made doors, these are available online in the resources section of your trade account or a hard copy can be delivered with your order. As well as these step-by-step instructions guides we offer a user guide for your customers and marketing brochures for you to promote your business.**

We're certain that you will have no problems fitting our straightforward doors, but if you do require any additional help you can contact one of our technical support team via phone or email. Alternatively, if you feel it might be too much or you don't have the time, we are happy to offer an installation service to provide a complete end-to-end solution for you.

# Slats

**We want our products to reflect our quality craftsmanship, so all of our slats are constructed out of strong, robust aluminium for longevity and durability, and are double skinned with a thick foam filled insert.**

## TD55 Slats

The slats for our TD55 range of doors are 55mm high and 8.2mm thick with a foam filled insert. The slats are made from powder coated aluminium available in a choice of 13 colours.

## TD77 Slats

Our range of TD77 slats are 77mm high and 18mm thick with a foam filled insert. Our slats are constructed out of high quality, powder coated aluminium and are available in any of the 17 colours in our range, with 14 painted colours and 3 laminate options to give your customers a wide range of aesthetic options.

Our slats are accurately assembled by our own on-site team to your customers' individual specifications, ensuring a perfect fit for every door frame, a strong seal and a long-lasting door.

**Our double skinned aluminium slats offer many benefits to your customers than a single metal sheet variety, including:**

- Increased insulation
- Strong physical barrier
- Reduced likelihood of break-ins
- Increased protection from ultraviolet and infrared rays
- Reduced sound pollution
- Protection against volatile weather
- Space saving within the garage
- Quieter functioning

## Free Colour Samples

These are photographic representations of our colours and although we have matched them as close as possible there is nothing like the real thing to show customers, this is why with our trade accounts we offer free colour samples that can be delivered to you as well as a range of marketing kits to help promote your company, if you are interested in these then please let us know when you fill in your trade account form. \*Please be aware that all colours can vary slightly due to batch variations.

\* Laminate options are only available in RD77 range

# Guide Runners

**We stock a large supply of robust and durable aluminium and powder coated guide runners, constructed to the highest quality using the finest materials. Our guide runners are specially designed to allow the curtain to run smoothly and with the double brush guide to protect the roller door system from debris that can get caught in the runner tracks and cause malfunctions.**

**Our guide runners will ensure a long lasting, quality product to ensure complete satisfaction for you and all your customers.**

## **TD55 Guide Runner**

Two piece construction  
100mm width  
36mm depth  
Range of 4 colours  
RAL colour match available

# Base Rails

**Our base rails are made from extruded aluminium to increase the strength of the curtain of the door, ensuring the longevity of our roller garage doors.**

**All of our base rails come as standard with a rubber strip in the bottom edge to help with insulation and noise reduction, while also working as a deterrent to pests and to provide protection against water ingress; our rubber seals help to keep your customers' garages protected all year round.**

## **TD55 BASE RAIL**

The last slat of the TD55 base rail is an extruded aluminium slat, powder coated to match the curtain colour. The slat is hollow, 49mm high and 8.2mm thick; there is a small rubber insert at the bottom to cushion the door, with the rubber seal being 6mm wide and 6mm high.

## **TD77 BASE RAIL**

The TD77 roller garage door has a base rail of powder coated extruded aluminium, made to match the colour of the door's curtain. The slat is hollow, 78mm high and 18mm thick with a rubber seal 15mm in width and 15mm high.
