Self-Assembly Roller Door Kits Brochure

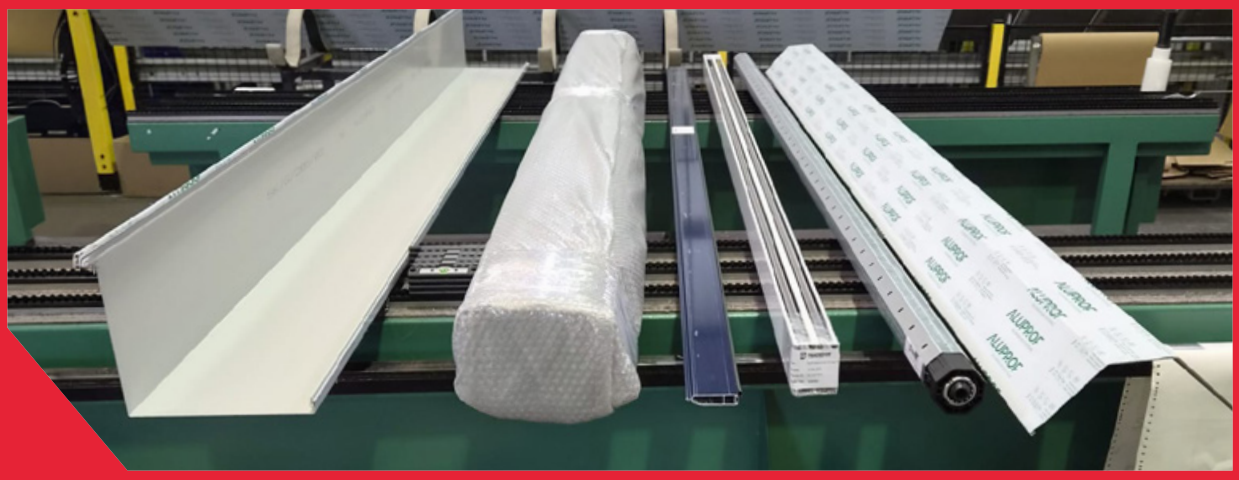

2026/01

What are self-assembly kits from Tradedor?

Tradedor's self-assembly garage doors are designed for trade customers looking for efficient solutions. Supplied as easy-to-install kits, these roller garage doors can be cut to suit the customer's exact dimensions.

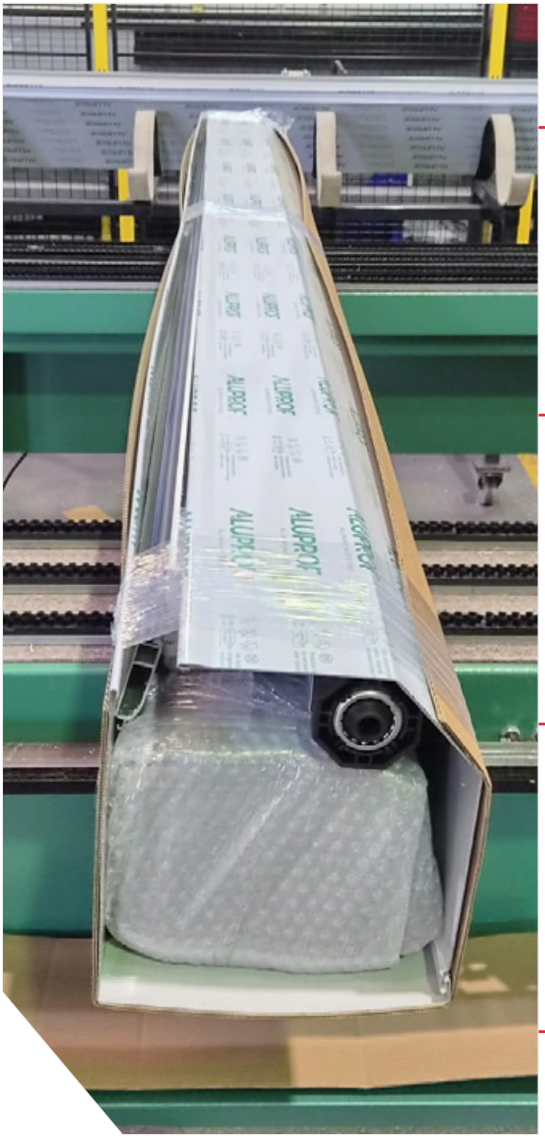

They give you the option to keep stock to speed up your installation times without having to hold excess on the shelf. Each kit comes with everything you need to manufacture a whole door, meaning there is no need to order complete packs of products, which will take up room in your storage and may be damaged.

Benefits of Tradedor roller garage doors

Our roller garage doors come with a whole host of benefits, including:

Speedy delivery

We provide fast delivery across the UK mainland, with many products reaching you within just 5-10 days.

Modern manufacturing techniques

We use state-of-the-art technology to eliminate the risk of any defects.

Fully in-house team

Our doors are never touched by a third party; we prepare everything in-house and deliver with our own drivers, ensuring the highest standard of craftsmanship.

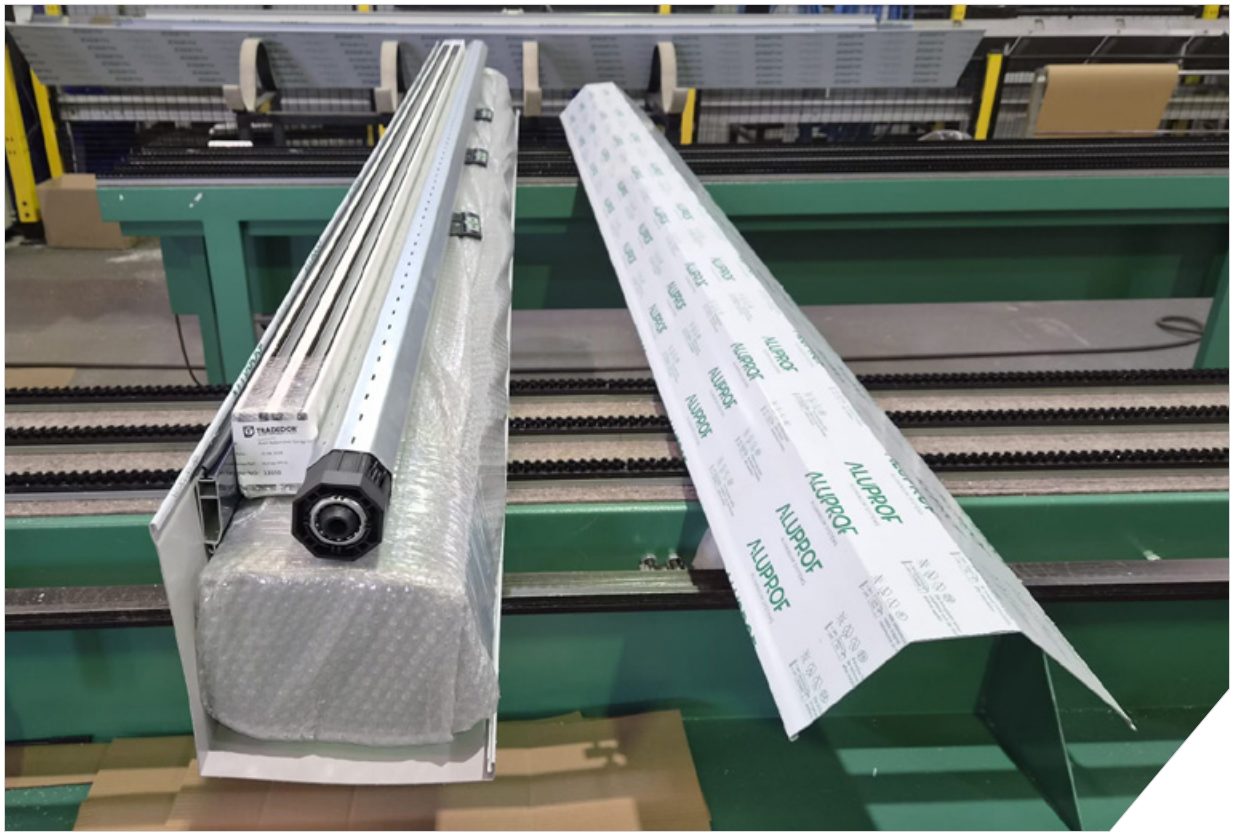

Competitive pricing

We offer the very best prices without compromising on quality.

Self-assembly garage door fitting

Tradedor's self-assembly kits provide trade professionals with an easy and straightforward solution. Kits are supplied in standard sizes and can then be manufactured to the correct dimensions you need.

This flexible approach means you can easily respond to your customers' demands with the peace of mind that you have a product of the highest quality. The self-assembly process is easy and practical for all trade professionals, but our knowledgeable support team is always on hand if you need any assistance.
